Xiaomi has begun rolling out MIUI 11 for a lot of devices in a lot of regions now. So, in case you have received the OTA update to MIUI 11 yet, here's how you can force download the MIUI 11 update on your phone. Note that the MIUI 11 update doesn't guarantee you the latest Android version (Android 10 right now) as you may still find your device running the current Android version, whether that be Android 10, Android 9 Pie, or anything else. What is MIUI 11 MIUI is an Android-based operating system built for Mi, Redmi, and Poco branded phones sold by Xiaomi and MIUI 11 is its latest iteration. Although MIUI is built on the Android platform, the default user interface is largely different from stock UI, something a lot of users have come to like while others simply hate it. Now in its eleventh edition, Xiaomi provides even more features and tweaks to personalize the software on your phone like never before. What are the new features in MIUI 11 With MIUI 11, Xiaomi phones now get a new minimalist design, system-wide dark mode, an Always-on display, Dynamic Clock, and personalized texts on the lock screen and breathing notifications. There are more wallpapers to set inside the Wallpaper Carousel and Themes app, dynamic wallpapers, the ability to set videos as wallpapers and new icons. For productivity, Xiaomi is offering a new Docs app for finding and editing documents easily, a To-Do app with voice controls and a floating calculator for multitasking. Other new features include Steps, Women's Health app and Quick Replies in landscape mode. Lastly, there's a new Mint Keyboard which supports English plus 25 Indic languages. Make sure that the file you downloaded was in .zip format. In case of an OTA update, ensure that your device currently runs on the MIUI version tagged with the update. Both the Recovery ROM and OTA can be flashed by the instructions given below. Download the MIUI 10 Recovery (or OTA if on a specific version of MIUI 10) update for your Xiaomi phone from the links above. Backup important data and files (there's a chance that your data could be erased). Go to Settings > System Developer Options. Turn off your device and press the Volume + Power buttons at the same time to enter Fastboot mode. Connect your device in fastboot mode to the PC using a compatible USB cable. Extract the Mi Flash Tool on your PC and install it. After installation, open MiFlash.exe. Now extract the Fastboot ROM (.tgz) file on your PC. Copy the path of this folder. Paste this folder path inside the address bar of the Mi Flash Tool application that you just opened. Click on the yellow circled-out button to refresh and MiFlash will automatically recognize your device. Tap on the red circled-out button to flash the ROM file to the device. Wait till the update is flashed onto your Xiaomi phone. When the update is done, the progress bar inside MiFlash will turn fully into green. Your device will automatically boot to MIUI 11.
